Christopher Vinciguerra

Clifton Park, NY | (518)935-3812 | christophervin1@gmail.com | www.chrisv.us | linkedin.com/in/chris-vinciguerra/

PROFESSIONAL SUMMARY

AI and software engineering leader with expertise in reinforcement learning, data curation, and neural networks. Led global teams at xAI to enhance AI capabilities; combined technical BS in Computer Science with MBA in Business Analytics for data-driven solutions. Eager to contribute to innovative SE projects.

SKILLS

- **Programming**: Python, JavaScript, C++, R, SQL
- **AI/ML:** Reinforcement Learning, TensorFlow, Keras, Neural Networks, SVM, Clustering, Decision Trees, Dimensionality Reduction, Data Curation
- **Tools/Frameworks:** Docker, Flask, MongoDB, Jira, SharePoint, Power Apps, Power Automate, GitHub, Pytest
  Methodologies: Agile/Scrum, Project Management, Data Quality Assurance

WORK EXPERIENCE

xAI **Remote**

Human Data Expert Team Lead **January 2025 - July 2025**

- Led a global team of 15 in curating high-quality data for RL models, enhancing AI capabilities in Python, JavaScript, and C++; developed workflow scripts that streamlined onboarding and data processes
- Created rubrics, instructions, and documentation for data correction; led weekly meetings to align team on shifting project goals and collaborated with AI engineers on data formats
- Built interactive scripts for testing repository setups in containerized environments; automated Dockerfile generation from JSON inputs including environment setup, repo installation, and Python dependencies; validated builds and tests to ensure reliable reinforcement learning environments with maximum coverage
- Conducted technical and project interviews in Python, independently evaluating candidates for advancement

Software Engineering Specialist, Human Data **September 2024 - January 2025**

- Collaborated with AI engineers to generate unique programming problems via Python scripts; optimized prompt crafting, semantic similarity filtering, and deduplication techniques for dataset expansion
- Performed QA and labeling on vendor-created and internally generated datasets for programming prompts, including corrections, solution writing, and test case verification to ensure accuracy, fairness, and completeness
- Edited GitHub-sourced issue descriptions and pull requests for model fairness in reinforcement learning

Regeneron Pharmaceuticals **Rensselaer, NY**

Computer System Validation Intern **May 2024 - July 2024**

- Spearheaded migration from SharePoint to Jira, boosting project visibility and efficiency for 40+ global users; reduced tracking errors through custom workflows
- Developed and implemented tailored workflows, issue types, fields, and validation in Jira to align with business needs
- Collaborated with CSV management and Jira admins to align Jira project configuration with strategic business objectives
- Created custom dashboards and queries to for key metrics in monthly senior management reports
- Authored detailed user documentation and held daily office hours to support smooth adoption by consultants and managers

Document Control Intern **May 2023 - August 2023**

- Designed and implemented a knowledge management tool for regulatory audits, addressing record-keeping gaps for 60+ topics in Document Control and Information Record Management teams
- Designed internal business applications for data collection and analysis using Power Apps, Power Automate, and SharePoint

Syracuse University **Syracuse, NY**

Academic Physics Coach **August 2021 - May 2024**

- Guided 160+ students across 4 semesters in introductory physics concepts via weekly worksheets and small-group sessions, addressing misunderstandings and fostering academic success.

EDUCATION

Syracuse University

Martin J. Whitman School of Management **Syracuse, NY**

Master of Business Administration **August 2022 - December 2024**

- Concentration in Business Analytics
- GPA: 3.99 / 4.0; Dean's list every semester
- **Relevant Coursework:** Machine Learning for Business, Business Analytics, Accounting Analytics, Digital Marketing Analytics, Financial Technology, Database Management Systems

College of Engineering & Computer Science **Syracuse, NY**
Bachelor of Science in Computer Science **August 2020 - December 2024**

- GPA: 3.87 / 4.0; Dean's list every semester
- **Relevant coursework:** Introduction to Artificial Intelligence, Data Structures, Analysis of Algorithms, Operating Systems Design, Object-Oriented Programming in C++, Principles of Social Media and Data Mining, Systems & Network Programming

PROJECTS

OnePolicy **Clifton Park, NY**
Co-Founder **January 2023 - October 2023**

- Co-founded startup delivering personalized life insurance quotes via deep neural networks; trained TensorFlow/Keras models with preprocessing techniques, slashing model size by 50%+ while preserving accuracy; deployed via Docker and REST API for 6+ insurers.

MUSIX **Syracuse, NY**
Co-Founder, Scrum Master **August 2022 - May 2023**

- Led a team of four in designing a location-based music web app and authored a comprehensive Software Requirements Specification (SRS) document following UML guidelines
- Acted as Scrum Master, managing Agile development through user stories, workload estimation, iterative sprints, and standup meetings, ensuring project deadlines were met
- Integrated Google Maps API with Flask backend to perform CRUD operations on Geospatial data in MongoDB database
- Launched a beta version in the Syracuse area utilizing Google Maps, Node.Js, MongoDB, and a Python backend with Flask

LEADERSHIP EXPERIENCE

Syracuse University Research & Development Club **Syracuse, NY**
President **April 2022 - August 2023**

- Organized weekly meetings and club activities to foster community in the ECS college within Syracuse
- Invited guests to host exploratory presentations of requested topics around current developments such as FinTech, LLMs, and Industrial Automation

Treasurer **August 2021 - April 2022**
